Are You A Bee? (Backyard Books)

Synopsis

Backyard Books: Are You a Bee? by Judy Allen with illustrations by Tudor Humphries shows that--from the perspective of a honeybee--the backyard is a busy place. A young bee faces many challenges as it takes its place in the hive and joins in the work of the bee community.

Age Range: 5 - 8 years

Grade Level: Kindergarten - 3

Customer Reviews

This book grabs the children's attention right from the beginning. I used it along with Insect Lore's Life Cycle Changes plastic "toy" to give a lesson to preschoolers through grade 2 on metamorphosis. I couldn't have been more pleased with the results. Everyone present learned something and the children loved the hands-on part as well.

This is a nice basic overview of the life cycle of bees and ties it in to beekeeping loosely near the end by showing women beekeepers with their kids. There is no character development of any kind here. Very short with fairly accurate pencil and watercolor illustrations. Also recommended: The BeeMan by Laurie Krebs - a story that is more human-centric about a boy and his apiarist grandfather.

I quite like the format of this book. It tells the story of bees by asking questions. At the end it turns around to what a child is. The illustrations are terrific and the information is perfect for young children to understand. I was so impressed that I bought numerous other books that are by the same authors and done in the same format. They will work well in my classroom.

My 3-year-olds love buzzing in their bee pajamas and we're considering getting our own hive, so needed a book to learn more about bees. Not sure about the kiddos, but I sure did! Great book, simple descriptions, and great illustrations.

This is a good nonfiction book for kids. My 7 year old enjoyed watching the bees in our backyard and this gave him a good explanation, at his level of understanding of what bees do. Highly recommend.

This book is educational as well as interesting for toddlers who love bugs. My grandson has begun a collection of these Backyard Books and loves for us to read it to him over and over again. It also adds to his interest in "the real thing."

Great illustrations and easy to read and understand for a young child. My 5 yr. old grand-daughter asked for a book about bees and this will be perfect. It seems full of facts to satisfy her curiosity without being so wordy she will get bored.

We have 2 others translated to Hebrew (snail, ladybug) and we loved them so much I have decided to get more, even though in English. My daughter is 2 yo and loves it, and even I learned a thing or two from these books!
