ISBN-10: 0316309435

ISBN-13: 978-0316309431

Product Dimensions: 9.8 x 0.1 x 8 inches

Shipping Weight: 5 ounces (View shipping rates and policies)

Average Customer Review: 4.1 out of 5 stars [See all reviews](#) (14 customer reviews)

Best Sellers Rank: #242,708 in Books (See Top 100 in Books) #145 in [Books > Children's Books > Education & Reference > Science Studies > Environment & Ecology](#) #296 in [Books > Children's Books > Growing Up & Facts of Life > Health > Diseases](#) #338 in [Books > Children's Books > Education & Reference > Science Studies > Nature > Environment](#)

Age Range: 5 - 8 years

Grade Level: Preschool - 3

## Customer Reviews

This is an amazing book. It covers the major groups of recyclables. It shares facts, tells children how to prepare each item to recycle, and gives a comprehensible description of how they are made into new products. At the end it even gives children ideas of how they can help.

As a teacher, I bought this for my class to read. It was a great book to add to my recycling unit! I would recommend for anyone who has children interested in recycling! Gail Gibbons books are always great!

This is an excellent book about recycling. If I had to read only one book to kids about recycling, this is the one I would choose. It is fun and has great pictures that really help you visualize the details of recycling. It is packed with information that is presented in a manner that makes it entertaining and easy to digest. Kindergarten and up will understand it, but for the younger kids, you will need to read

just a few pages at a time, while discussing what you've read.

I bought this book to help me put on a presentation on recycling to a cub scout den. Age group- first grade. I loved the book! I found it very informative and motivating. It touched on all the highlights of recycling. Even included info on landfills. It was presented in a format that a child could easily understand. I read it to my son. He didn't complain, but he loves books, and it really doesn't matter what you read to him. The day came for my presentation. As soon as I started reading the book to the den, I saw the look of boredom across all their faces (There were 6 of them). I think had they been at least in the third grade, it would have gone much better.

I paid \$6 for this book in order to use it for a lesson in connection with Earth Day. When the book arrived many of the pages were stuck together. I attempted to salvage what I could but the last 2 pages of the book are unreadable as parts of one page stuck to the opposite page (covering the words).

This book is full of facts and figures to demonstrate just how damaging some of the products we use every day can be to our environment. The information regarding the biodegradability of every day products will really make a person think about what they use and how they dispose of it.

While this book isn't the best I've found, it does have information a lot of other books don't have. It's a little hard for some younger learners to read as it has words like "bauxite" and "silica" but gives a pretty good background on renewable and non-renewable resources that go into your everyday products (glass, metal, paper, etc). The illustrations might be the best part of the book - as an informal educator with a non-profit organization, I mostly use this book for the pictures.
