AN Orange In January

Synopsis

Plump, juicy oranges are one of the great pleasures of winter—and one that is usually taken for granted. Now here's an eloquent, celebratory picture of how those oranges have found their way to the grocery store shelves, and then into kids' tummies! With vivid, glowing paintings, this unique picture book offers a poetic lesson about a plant's growth cycle and about the produce industry. We follow an orange from blossom to ripe fruit, from tree to truck to market . . . and into the hands of a boy who shares this treat with his friends on the playground, so that everyone could taste the sweetness of an orange in January. In the tradition of *Apple Farmer Annie* and *Red Leaf, Yellow Leaf*, this is a satisfying, celebratory look at an everyday object with a remarkable life story.

Customer Reviews

With its rich economics lessons, this delightful story for young readers describes the path of an orange from its growth in an orchard to its final destination in the hands of child. The book's clear text and vivid illustrations clearly communicate the various steps along this journey, including the work by farm workers to pick the orange, the farmer's delivery of the orange to a warehouse, a truck's delivery of the orange to a grocery store, and the child's purchase and enjoyment of the orange. These lessons about natural resources, interdependence, and markets are highlighted with the idea (through the title, text, and illustrations) that the child can enjoy this ripe, juicy orange in the

middle of winter. This book is ideal for teachers, parents, and volunteers who are seeking enjoyable children's books for younger readers with substantive content in economics and social studies.

A delightful way to take the reader through the journey from farm to mouth - a beautiful connection through seasons, across continents that fosters an appreciation for the origin of our food. Excellent for my young TK students when studying food, harvest, transportation, or seasons.

A wonderful book for pre-k through third grade to help children understand the relationship between climate and wants and needs. Teach reading, science, and social studies with a delightful story.
