# Air Is All Around You (Let's-Read-and-Find-Out Science 1)

## Synopsis

When it's not windy, it can be easy to forget about air. But air is everywhereâ€”it fills your house, your car, and even your empty milk glass. In fact, a regular room holds about 75 pounds of it! This Level 1 book, reillustrated with John O'Brien's clever, eye-catching illustrations, tells you how to discover the air that's all around you.

## Customer Reviews

I am a huge fan of the Let's-Read-and-Find-Out Science Series. As a homeschooling Mama, this series is what I chose to be our science curriculum (Kindergarten). I have many of these books, and adore most of them. Most are extremely informative, and very 'science-y'. I love, too, that many of them have experiments inside. Fun & intriguing, this hands-on stuff! The best part is that these books will surely be beloved additions to our library. I'm certain we'll enjoy reading & re-reading them for at least a few years. However ;-)) I was not overjoyed with "Snow is Falling". I had high expectations based on other books I have. This one did not live up to them. It lacked the truly educational, 'real-science' feel of most of the other books. What information it shared was extremely basic. I see where others have reviewed that it is good for Pre-schoolers; I'd have to agree. (I just

wish I'd read the reviews of that first!) The information it contains is so, so very basic. It lost my interest... and my child's (age, 5). I wish they'd gotten into 'the hows' of snow (how its formed, how it changes over time), but this was mostly about the effects of snow. It touched briefly on the fact that it's warmer under the snow, but not 'the why' behind that fact. The illustrations ARE wonderful, tho.. and the two experiments in the back appear quite fun. Sadly, for those of us living in a non-snow environment, we will only be able to do one of them. I also like that it lists three web sites on snow & weather to use as additional resources, as well as referencing you to three other books about snow. I just found it too simplistic. The writing, too, is awkward at points. "Night has come and snow is falling. It is quiet. The snow falls without a sound.
