Surprising Sharks: Read And Wonder

Synopsis

"Everything works in this book â " the informative yet humorous writing, the not-too-scary illustrations, and a superb layout that employs multisized text and bright color backgrounds to great effect." â "THE HORN BOOK"SHAAAARRRKK!" That's probably the last word anyone wants to hear while swimming in the warm blue sea. But most sharks aren't at all what people expect. In fact, those who think all sharks are giant, man-eating killers are in for a surprise. The compelling narrative, colorful illustrations, and captivating facts in SURPRISING SHARKS reveal that sharks come in all shapes and sizes â " and probably should be more afraid of humans than we are of them.

Grade Level: Preschool - 3

Customer Reviews

We teach shark week at our preschool center... I just reordered this book because our original copy fell apart from years of overuse... it teaches the children about sharks without the terrifying pictures you see in most of the other child oriented books... For years the children in my care have remembered more about the different types of sharks, their varying diets, shark anatomy, and human impact on them after reading this particular book... The illustrations are well done... My loves

this book so much, he drew his own version and stapled the pages together! The book also uses humor which helps to maintain their attention...

Since our first reading, my four year old daughter loves this book. She giggles at the humor and Nicola Davies wonderful use of her craft. A wonderful literary non-fiction choice.

The illustrations are fun and beautiful. It doesn't focus on sharks being scary like so many other shark books and it's got great shark facts for my shark obsessed 5 year old!

Very instructive book about sharks , easy , fun and clear for the kids to understand the content of the book .

It is hard to find narrative nonfiction and this book nails it. I can read it entirely to my class.
