There's No Place Like Space: All About Our Solar System (Cat In The Hat's Learning Library)

Synopsis

Au revoir, Pluto! In this newly revised, bestselling backlist title, beginning readers and budding astronomers are launched on a wild trip to visit the now eight planets in our solar system (per the International Astronomical Union's 2006 decision to downgrade Pluto from a planet to a dwarf planet), along with the Cat in the Hat, Thing One, Thing Two, Dick, and Sally. It's a reading adventure that's out of this world!

Book Information

Lexile Measure: AD520L (What's this?)

Series: Cat in the Hat's Learning Library

Hardcover: 48 pages

Publisher: Random House Books for Young Readers; First Edition edition (October 26, 1999)

Language: English

ISBN-10: 0679891153

ISBN-13: 978-0679891154

Product Dimensions: 6.7 x 0.4 x 9.3 inches

Shipping Weight: 7.2 ounces (View shipping rates and policies)

Average Customer Review: 4.7 out of 5 stars [See all reviews](#) (370 customer reviews)

Best Sellers Rank: #345 in Books (See Top 100 in Books) #1 in [Books > Science & Math > Astronomy & Space Science > Solar System](#) #1 in [Books > Children's Books > Education & Reference > Science Studies > Astronomy & Space > Aeronautics & Space](#) #1 in [Books > Children's Books > Education & Reference > Science Studies > Astronomy & Space > Astronomy](#)

Age Range: 4 - 8 years

Grade Level: Preschool - 3

Customer Reviews

This is the first of this series that I purchased and I was so surprised. I had been looking for books that would introduce science concepts to children under 4, and thankfully, this series does it. I do not think all of the books are equal with their rhyming style, but this is one of the best ones. This book introduces each of the planets, some constellations, the moon and the sun.

My 4 year old LOVES this book. It presents accurate information about the planets in a simplified, fun way that young readers (and parents, too) enjoy. If your budding astronomer or astronaut is looking for simple, fun, colorful books about space, this is the best!

I cannot say how impressed I am with The Cat in the Hat's Learning Library, they truly are wonderful books. There's No Place Like Space! is fun to read and helps children understand space and our solar system in a fun rhythmic way. My son loves this book and has shared it with his pre-school class with high praises from his teachers. The information in this book will give a young child a good base of knowledge for future learning.

Although these books are not written by Dr. Seuss, they follow his rhyming format fairly well and use the well known characters of: Cat-in-the-Hat, Thing 1 and Thing 2, and Sally and Dick. Since most kids are familiar with Cat in the Hat, the use of these characters to teach non-fiction works well. There's No Place Like Space covers all the planets in our Solar System, the moon, and touches on the constellations. The information on the planets is brief, think School House Rocks Interplanet Janet, since about the same amount of information is provided here. The book is great for introducing young children to the concepts of planets and the solar system, and is enjoyed by the children I read it too.

This book is wonderful! I feel that any time a book sparks the interest for young people it deserves high praise. My daughter enjoys all of the books in the Dr. Seuss Learning Library Series, but especially this one.

My kids (ages 8 to 10) all really enjoyed reading this. We have been learning about the Solar System and this went along very well with our studies. It's a very basic overview as far as information goes, about Pre-K/K level in my opinion. But a super fun read that we all enjoyed; from special needs to grade 3 (even mom whose about had it with the planet song).

I had to go to the bookstore last night to purchase a new book to read to the preschool class I teach. I can say without a doubt this was enjoyed by ALL the children. SO easy to read and accurate too :) They all enjoyed it and I am VERY happy to add this to my book collection!!

The concept of this learning book is fine and it is a good book to introduce young children to space. I read it to my 4 1/2-year-old granddaughter and she enjoyed it. However, about half of the poems could have been much better. They lacked proper poetic cadence. A few seemed very ordinary. The publisher surely should have asked the writer to improve them. The statement that the spinning

Earth will never slow down is technically incorrect. That's a fine point, but it would have been easy to present the idea correctly.
