Customer Reviews

This book is chocked full of information and summaries on explorers through the ages, beginning with the Vikings and moving through Lewis and Clark. Highly recommended for children who need to write 5th grade level reports but don't have grade level reading skills. Plenty of pictures, maps, and helpful illustrations without making it simplistic. Highly recommended for elementary classrooms.

I liked this book as it gave me a good picture of the men who explored America without my having to read 400 or more pages.

My daughter in 4th grade needed this as a required reading assignment. I'm sure that she will enjoy

it... made it so easy.

thanks

Perfect for the standard I was teaching.

This is a good book to use when studying explorers. I use it in my classroom. It is written in a style my students can understand and find informative.
