Customer Reviews

This book is very colorful, and informative as well. The bright pictures and flaps entertain pre-readers, and there's enough text to amuse older kids (but not too much older). The only knock is that because the images are computer-generated, the human figures are a wee bit creepy looking. Imagine the character models you might see in a computer game from 1999. On the other hand, the cars and backgrounds are beautiful.

This book is great. The pictures are in vivid color. The children run to get this book first. They even sit down together and share it. It is a great pick.

Awesome kids loved it
