## Synopsis

The award-winning National Geographic Kids United States Atlas features lively maps, and graphics; updated essays and statistics; 8 thematic map spreads, on topics such as immigration, natural hazards, the water crisis, and the "greening" of America; same-size physical and political maps for each region for easy comparison; vibrant photo essays on each region and state; more than 350 full-color illustrations; 80-plus pages of National Geographic maps; 50-plus info graphics; updated state fact boxes; geo-whiz facts; state flags, birds, and flowers; comprehensive place-name index with coordinates for easy reference; and glossary of geographic terms. Just like its companion volume National Geographic Kids World Atlas, the USA atlas is INTERACTIVE. A specially designed Web site will allow kids to link directly to hundreds of National Geographic maps, photographs, and articles plus videos, music, games, and more that will expand their knowledge and perspective about this country and its states and regions. All maps are custom-designed for middle-grade students by the Society's world-famous cartographers and each is shown in the context of surrounding areas. Throughout, locator maps and color coding make it easy for kids to keep track of where they are and to quickly navigate from region to region and state to state. The combination of large, detailed, yet easy-to-read maps--both physical and political; stunning, full-color photo essays; information-packed thematic spreads; and the interactive component sets this atlas apart from every other U.S. atlas currently available for the 8-12 age market and makes it an invaluable resource.

## Customer Reviews

Just perfect! Each state has information on manufacturing, natural resources and many bits of information that might be little known. Wonderful for youngsters...a great learning tool!

I brought this into my classroom and immediately had 5 students asking to read it and do projects from it! I really enjoy this atlas! You can do great economic geography lessons with it (specifically for Montessori classes) and it has lots of great info! Def recommend!

This offers many details for many major cities as well as rivers! I find this atlas is great for using with my older children (12 and 10 yrs old). It is arranged kind of funny, instead of being alphabetical they are arranged by region. Each state has an interesting story and a list of facts. It also has very nice color pictures

We are using this for our 4th Grade studies on each of the 50 states. I absolutely LOVE everything that is included with each state's section. You get a map, historical facts, and all kinds of wonderful information (state bird, flower, etc).

I bought this book for reviewing the states with our homeschooling curriculum and it is wonderful! I debated strongly about buying the kids version or the regular version and am very happy with the kids version that I decided on!

My 5 year old loves this book, but it is interesting even for me as an adult when we read it together. Very good book to make geography fun. We use it around the house in homeschooling, and just for looking at on rainy days.

We'll put together but not as informative as I would have liked. Still fun and education. Great for a beginner.

The book is a wonderful and detailed resource! I would recommend it for any classroom or

homeschool where Geography is studied.
