## Customer Reviews

My 18-month-old son loves playing with these books at a bookstore in town. He drives them all over the place. He doesn't seem very interested in the book's contents, but he has tried to open the book. It has a hook-and-loop closure, and he has trouble getting it open by himself. I think he'll become more interested in the picture of different diggers as he gets older, but right now he's just content to drive the book all over our house.

I bought multiple books in the Wheelie Book series. They are board books and most have wheels that turn. My grandson loves them because he is a fanatic about trucks and cars. Not much of a story line but more pictures of different vehicles with their names and some info on each. I would

recommend.

We have this book for probably 2 years and my son (at almost 4 years old) still took it for a trip in the car yesterday. For the relatively small price, as compared to other toys he has which were so much more money and he only played with once or twice, this was a good buy. Durable as it is still is in decent shape for the rough play it gets. I was more willing to buy him a "book" than just a matchbox / hotwheels car that just gets pushed around. The turning the "pages" and viewing different images made him think a little more I think, and he began to develop stories about the different images he saw in the book. We have other "wheelie" books and I have the same experience with all of them.

Our son is 21 months old and loves these books from DK Publishing. We found some at B & N, but the rest are available on . They list the proper name for the vehicle and have bright colorful pictures inside. The book has a velcro fastener to hold the pages together and he can roll the book around on the floor making it interactive. Older kids may not be interested because it is essentially a picture book, but little guys love them!

Our son Derek really enjoys it when he reads his digger book. The fact that everything has a proper name is a BIG plus. A bulldozer is exactly that, a bulldozer, not just, WOW, look at the big machine. We also like that there are true photos not just drawings.
